

## OCREVUS CONVERSATION GUIDE

# TALKING WITH YOUR DOCTOR<sup>☀</sup> ABOUT MS

Your experience with multiple sclerosis (MS) is uniquely yours, so it's important to share as much detail with your doctor as possible. This guide is designed to help you express the whole story of your life with MS. A complete view of your experience can help you and your doctor find the right care plan for you including medications, diet, exercise and other lifestyle adjustments.

### **What is OCREVUS?**

OCREVUS is a prescription medicine used to treat:

- Relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults
- Primary progressive MS, in adults.

It is not known if OCREVUS is safe and effective in children.

### **Who should not receive OCREVUS?**

**Do not** receive OCREVUS if you have an active hepatitis B virus (HBV) infection.

**Do not** receive OCREVUS if you have had a life-threatening allergic reaction to OCREVUS. Tell your healthcare provider if you have had an allergic reaction to OCREVUS or any of its ingredients in the past.

### **Important Safety Information**

#### **What is the most important information I should know about OCREVUS?**

**OCREVUS can cause serious side effects, including:**

- **Infusion reactions:** Infusion reactions are a common side effect of OCREVUS, which can be serious and may require you to be hospitalized. You will be monitored during your infusion and for at least 1 hour after each infusion of OCREVUS for signs and symptoms of an infusion reaction.

**OCREVUS**<sup>®</sup>

INJECTION FOR IV

Fill in the blanks below and tell your MS how you really feel. Be as honest and detailed as you can to give your doctor a comprehensive view of your MS.

# Dear MS,

I want to tell you \_\_\_\_\_  
TELL MS WHAT YOU THINK OF IT

You make me feel \_\_\_\_\_  
EMOTION OR STATE OF MIND

Since you've come into my life, I experience \_\_\_\_\_  
SYMPTOMS

Because of how you affect me, I have to \_\_\_\_\_  
CHANGES THAT HAVE IMPACTED YOU

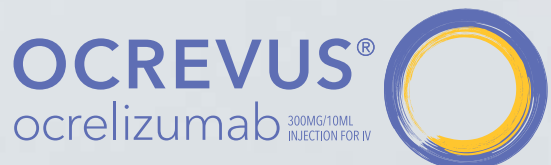

And you cause other problems that most people wouldn't think of, like \_\_\_\_\_  
SPECIFIC CHALLENGES

When I think about managing my MS, what I want most is \_\_\_\_\_  
YOUR GOALS FOR MANAGING YOUR MS

So, MS, I just want you to know, \_\_\_\_\_  
MESSAGE TO MS

Sincerely,  
\_\_\_\_\_

# A FEW MORE KEY POINTS.

If you have a relapsing form of MS, it's crucial to tell your doctor about how many relapses you've experienced and when your last relapse occurred.

- I've had \_\_\_\_\_ relapses.
- My last relapse was \_\_\_\_\_ ago.

Think about the symptoms you mentioned in your letter:

- What symptoms have you experienced since your last visit?

---

---

---

---

- Have those symptoms changed or become more frequent?

---

---

---

---

If you're currently on an MS treatment, think about how it's working for you or if you've experienced any new side effects. Is there anything you need to talk to your doctor about your current medication?

---

---

---

---

---

---

Finally, bring a list of any medications you're currently taking to help give your doctor the full picture.

- I am taking:

---

---

---

---

---

---

---

---

---

---

# REMEMBER TO ASK QUESTIONS.

Organize and write down any questions you might have about OCREVUS, MS or your management plan.

Additional questions/notes:

# Important Safety Information

## What is OCREVUS?

OCREVUS is a prescription medicine used to treat:

- Relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults
- Primary progressive MS, in adults.

It is not known if OCREVUS is safe and effective in children.

## Who should not receive OCREVUS?

**Do not** receive OCREVUS if you have an active hepatitis B virus (HBV) infection.

**Do not** receive OCREVUS if you have had a life-threatening allergic reaction to OCREVUS. Tell your healthcare provider if you have had an allergic reaction to OCREVUS or any of its ingredients in the past.

## What is the most important information I should know about OCREVUS?

### OCREVUS can cause serious side effects, including:

- **Infusion reactions:** Infusion reactions are a common side effect of OCREVUS, which can be serious and may require you to be hospitalized. You will be monitored during your infusion and for at least 1 hour after each infusion of OCREVUS for signs and symptoms of an infusion reaction.
- **Infection:** OCREVUS increases your risk of getting upper respiratory tract infections, lower respiratory tract infections, skin infections, and herpes infections. Infections are a common side effect, which can be serious. Tell your healthcare provider right away if you have an infection. Your healthcare provider should delay your treatment with OCREVUS until your infection is gone.
- **Decreased Immunoglobulins:** OCREVUS may cause a decrease in some types of immunoglobulins. Your healthcare provider will do blood tests to check your blood immunoglobulin levels.

## What are the possible side effects of OCREVUS?

### OCREVUS may cause serious side effects, including:

- **Risk of cancers (malignancies) including breast cancer.** Follow your healthcare provider's instructions about standard screening guidelines for breast cancer.

These are not all the possible side effects of OCREVUS.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

For more information, visit [OCREVUS.com](https://www.ocrevus.com) or call 1-844-627-3887.
